Education

University at Buffalo, The State University of New York

Buffalo, NY

Bachelor of Science in Computer Science (GPA: 3.62)

May 2020

Experience

Software Engineer - EasyPost

November 2021 - Present

- Manage EasyPost's API client libraries (Java, C#, Python, Node.js, Ruby, Go, PHP) by adding new features, ensuring functionality parity between seven libraries, and optimizing the code
- Investigate and fix bugs for customers' reported tickets in Python micro-services architecture backend
- Triage GitHub open issues and review pull requests with valuable feedback in a timely manner
- Update website API documentation regularly to ensure developers have an up-to-date reference guide

Application Developer - Northwest Bank

May 2020 - November 2021

- Utilized Angular, ASP.NET Web API, and SQL Server to develop an internal web application that is used by around 2500 employees to share their innovative ideas on how to improve the bank
- Leveraged Microsoft Form Recognizer to develop an application that can extract text, tables, and signatures from documents by using .NET Framework, SSIS package, C#, and SQL Server
- Converted PDF forms to SharePoint List forms with JavaScript and jQuery for customization
- Maintained internal website application and responded to user's questions on a daily basis

Software Engineer Intern - SyncIoT Technologies

July 2019 - August 2019

- Constructed a full-stack web application that allows customers to see data from the IoT sensor by using HTML, CSS, JavaScript, ExpressJS, MongoDB, Bootstrap, AWS, and Node.js
- Designed user privilege along with the administrator system and implemented them on the website
- Implemented several new features with APIs and improved website stability

Web Developer Intern - Alzerina Jewelry

May 2018- August 2018

- Managed the company website content and added/removed products through Shopify
- Created a new website for Alzerina Fashion by using HTML, CSS, JavaScript, and Bootstrap

Projects

Social Media Website - React, Node.js, AWS EC2 and S3, Nginx, Socket.io

Spring 2020

- Developed a full-stack multimedia [social networking website](#) that allows people to connect with others through posting, messaging, and commenting
- Implemented most backend functions such as real-time message, notification system, and create posts
- Led a small team to come up with the idea and design in agile software development

Bookdeal Platform - React, Node.js, MongoDB, ExpressJS, Postman, Selenium

Spring 2019

- Built a [full-stack web application](#) for students to buy and sell items by using MERN Stack
- Developed unit tests and implemented new features by using Postman and third-party APIs

Skills

Programming: Java, PHP, SQL, C++, C#, Python, Ruby, Go, HTML, CSS, JavaScript, Node.js

Frameworks and Tools: Angular, React, .NET, Jira, Microsoft SQL Server, Microsoft SharePoint, MongoDB, MongoDB Atlas, Mongoose, MySQL, Bootstrap, ExpressJS, Amazon Web Services, Nginx, Git, jQuery, Visual Studio, Android Studio, Postman, Jenkins, GitHub Actions, Phabricator
